Overview

This is short story of a bear and his favourite toy.

The user will be given option which may influence the story while searching for the toy.

User Inputs

String Inputs

In some cases user inputs must be exact and are case-sensitive.

These will be enclosed with [and]

For example:

```
(Narrator) This is a story about a bear who lost his favourite toy.  
(Narrator) Would you like to help him look for his toy?  
[Yes] or [No]  
Yes
```

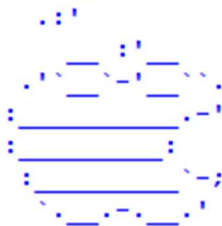

Any other string inputs will be the user's choice.

Number Inputs

Some user inputs will require whole number

For example:

```
(Winnie) I did find 5 apples though.
```

```
(Narrator) Well John, as you're the guest, how many would you like?.
```

```
Enter a whole number (0-5)
```

```
2
```

Some user inputs will require decimal number

For example:

```
(Winnie) That is a very tall slide.
```

```
(Winnie) I think it's at least 2 meters high, but it cant be more than 3.
```

```
(Winnie) How tall do you think it is?
```

```
Enter a number (2.0 - 3.0)
```

```
2.1
```
